Chairman's Statement 主席報告書

To Shareholders:

On behalf of the Board (the "Board") of Directors (the "Directors"), I am pleased to present the annual report of Pan Asia Environmental Protection Group Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") for the year ended 31 December 2014. Throughout the financial year of 2014, the Group maintained its position as an integrated environmental protection ("EP") services and eco-friendly construction materials provider by leveraging its well-established industry experience, which led to remarkable business growth.

As most cities in the People's Republic of China (the "PRC") have been afflicted by severe smog problems in recent years, the Central Government (the "Central Government") of the PRC has strived to formulate and subsequently implement various policies to reduce major pollutants in the environment. Further to the "Airborne Pollution Prevention and Control Action Plan" published on 12 September 2013, the Ministry of Environmental Protection mandated a 2% drop in emission of sulphur dioxide and a 5% drop for nitrogen oxide in 2014. A total of 1,473 projects were planned to be launched by 2014, targeting denitrification enhancement covering a 130 million kilowatt output of thermal power plants and the installation of denitrification facilities for steel sintering machines covering 15,000m².

In addition, an Environmental Protection Law with stronger provisions has come into effect aiming at reducing water pollution. The Ministry of Environmental Protection has proposed a total of 54 projects to support the implementation of the new law. Five regulations covering the release of information and daily fines for pollution came into effect in 2014. Under the revised law, polluters would be charged daily fines for violations, with no upper limits on penalties set. Restrictions over emissions of pollutants in key industries such as paper making and printing and dyeing industries are to be strengthened as well. Under the "Water Pollution Prevention and Control Action Plan" (水污染防治行動計劃), the PRC plans to spend RMB2 trillion to more actively tackle pollution of its scarce water resources through investing in the sewage treatment, recycling and membrane technology. The Central Government for its part is enhancing water pollution preventive measures by finalising a stricter water management system. Through the formulation and subsequent implementation of the plan, the Central Government has stepped up pollution prevention efforts in major rivers and for underground aquifers, with a target of reducing water pollution emissions of key industries by more than 30% by 2015.

Chairman's Statement 主席報告書

In the "Development Plan of Green Building and Green Ecological Districts" (綠色建築和綠色生態城區發展規劃) of the "Twelfth Five-Year Plan", green construction standards have been applied to Affordable Housing projects in provincial capitals as well as large-scale projects such as airports, train stations, hotels, malls and offices buildings since 2014. Moreover, property developers have been encouraged to establish green residential districts and the Central Government aims to have more than 50% of the new property projects in municipalities and cities in the Eastern coastal areas being in compliance with green construction standards by 2015.

The high priority and more active promotion of EP by the Central Government have created favorable opportunities for the industry as a whole and the Group in particular. In order to capture the opportunities presented by the surging market demand for green construction materials as mandated by government policies, the Group is boosting its development of the eco-friendly construction materials business by further strengthening the promotion of its Wood Wool Cement Board ("WWCB").

PROSPECTS

Eco-friendly construction materials business – increasing popularity with immense potential

In battling the widely-publicized pollution crisis, the Central Government of the PRC is actively promoting reduction of carbon dioxide by designating the construction of green buildings as a key strategy to save energy and reduce carbon dioxide emission. By 2020, more than 30% of new buildings in cities are to adopt green building standards. In addition, the State Council's "Green Building Action Plan" clearly defines the country's determination to enhance the development of green construction materials and assist the development of such material industry. Driven by the Central Government's policies and its increased efforts to promote the construction of green buildings, the market demand for eco-friendly construction materials continues to increase, and the increasing market recognition of the benefits of WWCB underscores its strong development potential.

In view of the huge opportunities in the industry, the Group has been aggressively expanding its eco-friendly construction materials business. The Group owns the exclusive right to import WWCB production facilities from the Netherlands and operate them in the PRC and its engineering experts and sales and marketing team have been actively promoting the products. With the national standards for WWCB construction and inspection, architectural design institutes can design projects based on these standards. As a result, the market recognition of WWCB is set to expand and the application of WWCB will become more widespread across a range of projects. Meanwhile, the preliminary construction of the Yihe residence project in Inner Mongolia and a resort hotel project in Yichang, Hubei have been completed. It is expected that the construction of the first high-rise building will be completed in 2015.

The Group has commenced construction of two highway sound barrier projects. The Foshan Highway project is expected to be completed in the first half of 2015. The Group's participation in the Jiamin Highway project is also in progress with the preliminary phase completed. Besides participating in infrastructure works, the Group's participation in projects for the Yixing Cultural Center and China Communications Construction Company Real Estate Company Limited has been confirmed, and is expected to contribute income in 2015.

展望

環保建材業務 - 日漸普及, 潛力龐大

本集團於佛山高速公路項目隔聲屏障的工程已開始動工,預期將於二零一五年上半年竣工。而本集團參與的嘉閔高速公路項目亦在興建中,初期工程已經完工。除基建項目外,本集團亦已落實參與宜興文化中心及中交地產的項目,預計將於二零一五年帶來收入。

Chairman's Statement 主席報告書

With three production lines already in commercial operation, the Group will conduct final test runs for two more production lines in April 2015 and for another one in mid-2015. With all these new production lines scheduled to be fully operational by June 2015, the Group's productivity in the second half of 2015 will be improved and its workflow will be optimized.

To make the most out of the business opportunities, the Group is leveraging its abundant industry experience to expand production capacity, as it enhances regional cooperation with strategic partners. At the same time, apart from cooperating with construction companies and contractors, the Group is directly selling WWCB within specific application areas and geographical regions, while improving its product specifications and quality in an effort to optimize its sales network.

Water and flue gas treatment business – continues to bring revenue with stable performance

In recent years, EP has been an increasingly important issue in the PRC. Regarding environmental pollution, especially the severe smog problem and mounting water pollution, the Central Government has launched a series of policies and specific measures to address these issues.

The strongly supportive national policies have significantly spurred domestic demand for the EP products. Around 4,500 waste water treatment plants in the PRC are required to be upgraded to Grade 1A emission standards, thus creating a strong market demand. The Group's water treatment business for its part owns several patents. Its special chemical ingredients can dissolve the organisms in sludge and reduce sludge volume by 50%, thus saving around 70% of waste water treatment cost and improving the cost efficiency of water treatment. As the Group's proprietary technology is fundamentally different from traditional sludge treatment methods, it can reduce secondary pollution as well. As a result, the Group's participation in several coal chemical water treatment projects in Inner Mongolia are expected to be confirmed soon, which promise to contribute substantial income.

本集團的三條生產線已投產,另外兩條將 於二零一五年四月進行最後調試,而餘下 的一條則於二零一五年中進行調試。隨著 所有新生產線於二零一五年六月全面投產 後,本集團於二零一五年下半年的生產力 將獲提升,工作流程亦將更趨完善。

為充分把握商機,本集團利用其在行業的豐富經驗擴充產能,同時加強與策略性夥伴的地域合作。除與建築公司及承包商合作外,本集團現直接在特定應用範圍及地區銷售木絲水泥板,並同時優化產品規格及質量,以完善銷售網絡。

水及煙氣處理業務 - 表現穩定,持續帶來 收益

近年,環保已成為中國日益關注的問題。 為針對環境污染,特別是嚴重霧霾天氣及 水污染問題,中央政府已推出一連串政策 及特定措施。

國家政策的大力支持大大刺激了國內環保行業產品的需求。目前中國約4,500家污水處理廠需進行改造提標,以達到1A級水排放標準,因而創造龐大的市場需求。本集團的污水處理業務擁有若干專利的化學藥劑成份有效溶解污泥約有效溶解污泥處理成本並提高成本效益。有知分於的污泥。有鑒於此,本集團於內蒙古的將二次污染。有鑒於此,本集團於內蒙古期將帶來穩定的收入。

Management Discussion and Analysis 管理層討論與分析

In view of the huge potential of WWCB, the Group has engaged in cooperation with the industry leader from the Netherlands, and has introduced WWCB and large wall components in the PRC on an exclusive basis. Among the six production lines imported from the Netherlands, each with an annual capacity of approximately 140,000m³, five are standard lines that produce WWCB of varying thickness from 10mm to 100mm. The other is the most advanced and is a fully automated large wall component production line which can manufacture large wall components with a maximum dimensions of 3m x 6m x 40cm which can be directly installed. Based on its expertise in large wall components, the Group has developed integrated wall component products boasting features of wall components, decoration and heat preservation, thus saving production cost for construction companies and contractors. As at the end of 31 December 2014, three production lines have commenced commercial operation.

有見木絲水泥板潛力龐大,本集團與來自

As the largest and most advanced WWCB producer in the world, the Group leverages its own R&D capability to upgrade the products to meet local needs in the PRC. During the year under review, the Group has compiled and submitted the national industry standards "Technological Specifications for Application of WWCB" to the Ministry of Housing and Urban-Rural Development of the PRC (中華人民共和國住房和城鄉建設部) for approval. Report of the Directors 董事會報告

2009. The permitted business scope on the business licence of Jiangsu Tianyuan includes, among others, research and development of denitrification EP equipment and technology, manufacture of FGD EP equipment, desulphurization absorption tower and flue glass flake anticorrosive material and denitrification EP equipment. As at the date of this annual report, Jiangsu Tianyuan was principally engaged in the business of producing thermal insulation components, and was not engaged or interested in any businesses which compete with the current principal businesses of the Group. The permitted scope of business of each of Benxi Fanya and Jiangsu Tianyuan is relatively wide, but it is not unusual for a corporate entity to provide for a broader scope of business in its corporate documents to allow for flexibility. At present, neither Benxi Fanya nor Jiangsu Tianyuan has any plan to vary their respective business licences to exclude or alter the permitted activities as set out therein.

之製造。於本年報日期及江蘇天元主要從事生產熱絕緣元件之業務,而並無從事與本集團現有主要業務構成競爭之任何業務或於其中擁有權益。本溪泛亞與江蘇天元之獲許可經營範圍相對較廣。但為保持靈活性,一間公司實體往往會於其公司文件中設定較廣之業務範圍。目前,本溪泛亞與江蘇天元並無計劃更換其各自之營業執照,以去除或修改其中載明之獲許可業務。

Mr. Jiang Quanlong is also the chairman and one of the executive directors of China Rare Earth Holdings Limited ("CRE"), a company whose securities are listed on the Main Board of the Stock Exchange. We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

OPINION

b) Basis of preparation of the financial statements

The consolidated financial statements for the year ended 31 December 2014 comprise the Company and its subsidiaries.

The measurement basis used in the preparation of the financial statements is the historical cost basis except for certain financial instruments, which are stated at their fair value as explained in the accounting policies set out below.

The preparation of financial statements in conformity with HKFRSs requires management to make judgements, estimates and assumptions that affect the application of polices and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about the carrying amounts of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of HKFRSs that have a significant effect on the financial statements and major sources of estimation uncertainty are discussed in note 39.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

c) Subsidiaries and non-controlling interests

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether the Group has power, only substantive rights (held by the Group and other parties) are considered.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases. Intra-group balances, transactions and cash flows and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

Non-controlling interests represent the equity in a subsidiary not attributable directly or indirectly to the Company, and in respect of which the Group has not agreed any additional terms with the holders of those interests which would result in the Group as a whole having a contractual obligation in respect of those interests that meets the definition of a financial liability.

Non-controlling interests are presented in the consolidated statement of financial position within equity, separately from equity attributable to the owners of the Company. Non-controlling interests in the results of the Group are presented on the face of the consolidated statement of profit or loss and other comprehensive income as an allocation of the total profit or loss and total comprehensive income for the year between non-controlling interests and the owners of the Company. Loans from holders of non-controlling interests and other contractual obligations towards these holders are presented as financial liabilities in the consolidated statement of financial position.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

c) Subsidiaries and non-controlling interests (Continued)

Changes in the Group's interests in a subsidiary that do not result in a loss of control are accounted for as equity transactions, whereby adjustments are made to the amounts of controlling and non-controlling interests within consolidated equity to reflect the change in relative interests, but no adjustments are made to goodwill and no gain or loss is recognised.

When the Group loses control of a subsidiary, it is accounted for as a disposal of the entire interest in that subsidiary, with a resulting gain or loss being recognised in profit or loss. Any interest retained in that former subsidiary at the date when control is lost is recognised at fair value and this amount is regarded as the fair value on initial recognition of a financial asset, or, when appropriate, the cost on initial recognition of an investment in an associate or joint venture.

In the Company's statement of financial position, an investment in a subsidiary is stated at cost less impairment losses (see note 2(g)), unless the investment is classified as held for sale (or included in a disposal group that is classified as held for sale).

d) Other investments in equity securities

The Group's and the Company's policies for investments in equity securities, other than investments in subsidiaries, are as follows:

Investments in equity securities are initially stated at fair value, which is their transaction price unless it is determined that the fair value at initial recognition differs from the transaction price and that fair value is evidenced by a quoted price in an active market for an identical asset or liability or based on a valuation technique that uses only data from observable markets. Cost includes attributable transaction costs, except where indicated otherwise below. These investments are subsequently accounted for as follows, depending on their classification:

c) 附屬公司及非控股權益(續)

本集團於一間附屬公司之權益 變動(並無導致失去控制權) 列作權益交易,並對合併權益 中的控股及非控股權益金額作 出調整,以反映有關權益的變 動,惟概無對商譽作出任何調 整及並無確認任何損益。

在本公司財務狀況表中,附屬公司之投資以成本減任何減值虧損列賬(見附註2(g)),除非該投資被列為持作銷售(或計入分類為持作出售之出售組別)。

d) 其他股本證券投資

本集團及本公司之股本證券投資(除附屬公司投資外)政策如下:

股本證券投資初步按公平值 (即其交易價格)列賬;但如可 根據一項變數只包括可觀察市 場數據之估值方法更可靠地估 計出公平值則除外。成本包括 應佔交易成本;惟下文所述者 除外。此等投資其後因應所屬 分類入賬如下:

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

d) Other investments in equity securities (Continued)

Investments in securities held for trading are classified as current assets. Any attributable transaction costs are recognised in profit or loss as incurred. At the end of each reporting period the fair value is remeasured, with any resultant gain or loss being recognised in profit or loss. The net gain or loss recognised in profit or loss does not include any dividends or interest earned on these investments as these are recognised in accordance with the policies set out in note 2(s)(v) and (iv).

Investments in securities which do not fall into securities held for trading or held-to-maturity securities are classified as available-for-sale financial assets. At the end of each reporting period the fair value is remeasured, with any resultant gain or loss being recognised in other comprehensive income and accumulated separately in equity in the fair value reserve. As an exception to this, investments in equity securities that do not have a quoted price in an active market for an identical instrument and whose fair value cannot be reliably measured are recognised in the statement of financial position at cost less impairment losses (see note 2(g)). Dividend income from equity securities is recognised in profit or loss in accordance with the policy set out in note 2(s)(v).

When the investments are derecognised or impaired, the cumulative gain or loss recognised in equity is reclassified to profit or loss. Investments are recognised/derecognised on the date the Group commits to purchase/sell the investments or they expire.

e) Property, plant and equipment

Property, plant and equipment, other than construction in progress, are stated in the statement of financial position at cost less any accumulated depreciation and any accumulated impairment losses (see note 2(g)).

Depreciation is calculated to write off the cost of items of property, plant and equipment, less their estimated residual value, if any, using the straight-line method over their estimated useful lives.

Buildings Over the shorter of the term of the lease and 20 years

Furniture, fixtures

and equipment 5 years
Leasehold improvements 1 year to 5 years
Motor vehicles 5 years
Molding 1 year
Plant and machineries 10 years

Where parts of an item of property, plant and equipment have different useful lives, the cost of the item is allocated on a reasonable basis between the parts and each part is depreciated separately. Both the useful life of an asset and its residual value, if any, are reviewed annually.

物業、廠房及設備(在建工程除外)概以成本減任何累積折舊及任何累積減值虧損於財務狀況表列賬(見附註2(g))。

For the year ended 31 December 2014 截至二零一四年十二月三十一日止年度

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

e) Property, plant and equipment (Continued)

Gains or losses arising from the retirement or disposal of an item of property, plant and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in profit or loss on the date of retirement or disposal.

f) Leased assets

An arrangement, comprising a transaction or a series of transactions, is or contains a lease if the Group determines that the arrangement conveys a right to use a specific asset or assets for an agreed period of time in return for a payment or a series of payments. Such a determination is made based on an evaluation of the substance of the arrangement and is regardless of whether the arrangement takes the legal form of a lease.

i) Classification of assets leased to the Group

Assets that are held by the Group under leases which transfer to the Group substantially all the risks and rewards of ownership are classified as being held under finance leases. Leases which do not transfer substantially all the risks and rewards of ownership to the Group are classified as operating leases, except for land held for own use under an operating lease, the fair value of which cannot be measured separately from the fair value of a building situated thereon at the inception of the lease, which is accounted for as being held under a finance lease, unless the building is also clearly held under an operating lease. For these purposes, the inception of the lease is the time that the lease was first entered into by the Group, or taken over from the previous lessee.

2. 主要會計政策(續)

e) 物業、廠房及設備(續)

因報廢或出售物業、廠房及設備項目而產生之盈虧乃釐定為出售所得款項淨額與該項目之 賬面值間之差額,並於報廢或出售之日於損益內確認。

f) 租賃資產

如本集團能確定某項安排賦予有關人士權利,可透過付款明市於協定期間內使用特定資產,有關交易可不到交易或包含租賃。本集團之計論乃基於有關安排之細節,並不論有關安排是否具備租賃之法律形式。

i) 本集團租用之資產之分類

就本集團根據租賃持有 之資產而言,如有關租 賃把絕大部份擁有權之 風險及利益轉移至本集 團,則有關資產被分類 為根據融資租賃持有之 資產。不會轉移絕大部 份擁有權之風險及利益 予本集團之租賃乃分類 為經營租賃;惟根據經 營租賃持作自用之土地 而言,如其公平值不能 夠與訂立租賃時已建於 其上之建築物之公平值 分開計量,則將當作根 據融資租賃持有者入 賬;惟如有關建築物亦 是根據經營租賃確實持 有則除外。就此而言, 訂立租賃之時指本集團 首次訂立租賃之時,或 自前度承租人接收之時。

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

f) Leased assets (Continued)

ii) Operating lease charges

Where the Group has the use of assets under operating leases, payments made under the leases are charged to profit or loss in equal instalments over the accounting periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the leased asset. Lease incentives received are recognised in profit or loss as an integral part of the aggregate net lease payments made. Contingent rentals are charged as expenses in the accounting period in which they are incurred.

iii) Leasehold land and building

When a lease includes both land and building elements, the Group assesses the classification of each element as a finance or an operating lease separately based on the assessment as to whether substantially all the risks and rewards incidental to ownership of each element have been transferred to the Group, unless it is clear that both elements are operating leases in which case the entire lease is classified as an operating lease. Specifically, the minimum lease payments (including any lump sum upfront payments) are allocated between the land and the building elements in proportion to the relative fair values of the leasehold interests in the land element and building element of the lease at the inception of the lease.

To the extent the allocation of the lease payments can be made reliably, interest in leasehold land that is accounted for as an operating lease is presented as "prepaid lease payments" in the consolidated statement of financial position and is amortised over the lease term on a straight-line basis.

f) 租賃資產(續)

ii) 經營租賃支出

iii) 租賃土地及樓宇

當租賃包括土地及樓宇 部份,本集團根據對附 於各部份所有權之絕大 部份風險及回報是否已 轉移本集團之評估,分 別將各部份之分類評定 為融資或經營租約,惟 在該兩部份均明顯為經 營租約之情況下,整份 租賃歸類為經營租賃。 具體而言,最低租賃款 項(包括任何一筆過預付 款項)於租約訂立時按租 約土地部份及樓宇部份 中之租賃權益相對公平 值比例於土地與樓宇部 份間分配。

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

g) Impairment of assets

 i) Impairment of investments in equity securities and other receivables

Investments in equity securities and other current and non-current receivables that are stated at cost or amortised cost or are classified as available-for-sale financial asset are reviewed at the end of each reporting period to determine whether there is objective evidence of impairment. Objective evidence of impairment includes observable data that comes to the attention of the Group about one or more of the following loss events:

- significant financial difficulty of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the debtor will enter bankruptcy or other financial reorganisation;
- significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor; and
- a significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.

If any such evidence exists, any impairment loss is determined and recognised as follows:

 For unquoted equity securities carried at cost, the impairment loss is measured as the difference between the carrying amount of the financial asset and the estimated future cash flows, discounted at the current market rate of return for a similar financial asset where the effect of discounting is material. Impairment losses for equity securities carried at cost are not reversed.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

g) Impairment of assets (Continued)

- i) Impairment of investments in equity securities and other receivables (Continued)
 - For trade receivables and other current receivables and other financial assets carried at amortised cost, the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition of these assets), where the effect of discounting is material. This assessment is made collectively where these financial assets share similar risk characteristics, such as similar past due status, and have not been individually assessed as impaired. Future cash flows for financial assets which are assessed for impairment collectively are based on historical loss experience for assets with credit risk characteristics similar to the collective group.

If in a subsequent period the amount of an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised, the impairment loss is reversed through profit or loss. A reversal of an impairment loss shall not result in the asset's carrying amount exceeding that which would have been determined had no impairment loss been recognised in prior years.

 - For available-for-sale financial asset, the cumulative loss that has been recognised in the fair value reserve is reclassified to profit or loss. Impairment losses recognised in profit or loss in respect of available-for-sale financial asset are not reversed through profit or loss. Any subsequent increase in the fair value of such asset is recognised in other comprehensive income.

i) Impairment of investments in equity securities and other receivables (Continued)

Impairment losses are written off against the corresponding assets directly, except for impairment losses recognised in respect of debtors included within trade and other receivables, whose recovery is considered doubtful but not remote. In this case, the impairment losses for doubtful debts are recorded using an allowance account. When the Group is satisfied that recovery is remote, the amount considered irrecoverable is written off against debtors directly and any amounts held in the allowance account relating to that debt are reversed. Subsequent recoveries of amounts previously charged to the allowance account are reversed against the allowance account. Other changes in the allowance account and subsequent recoveries of amounts previously written off directly are recognised in profit or loss.

ii) Impairment of other assets

Internal and external sources of information are reviewed at the end of each reporting period to identify indications that the following assets may be impaired or an impairment loss previously recognised no longer exists or may have decreased:

- property, plant and equipment;
- prepaid lease payments; and
- investment in subsidiaries in the Company's statement of financial position.

If any such indication exists, the asset's recoverable amount is estimated.

Calculation of recoverable amount

The recoverable amount of an asset is the greater of its fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit).

g) Impairment of assets (Continued)

ii) Impairment of other assets (Continued)

Recognition of impairment losses

An impairment loss is recognised in profit or loss if the carrying amount of an asset, or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit (or group of units) and then, to reduce the carrying amount of the other assets in the unit (or group of units) on a pro rata basis, except that the carrying amount of an asset will not be reduced below its individual fair value less costs of disposal (if measurable) or value in use (if determinable).

Reversals of impairment losses

An impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount.

A reversal of an impairment loss is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognised.

g) Impairment of assets (Continued)

iii) Interim financial reporting and impairment

Under the Listing Rules, the Group is required to prepare an interim financial report in compliance with HKAS 34, Interim Financial Reporting, in respect of the first six months of the financial year. At the end of the interim period, the Group applies the same impairment testing, recognition, and reversal criteria as it would at the end of the financial year (see notes 2(g)(i) and (ii)).

Impairment losses recognised in an interim period in respect of available-for-sale financial asset and unquoted equity securities carried at cost are not reversed in a subsequent period. This is the case even if no loss, or a smaller loss, would have been recognised had the impairment been assessed only at the end of the financial year to which the interim period relates. Consequently, if the fair value of an available-for-sale financial asset increases in the remainder of the annual period, or in any other period subsequently, the increase is recognised in other comprehensive income and not profit or loss.

h) Inventories

Inventories are carried at the lower of cost and net realisable value. Cost is calculated using the weighted average cost formula and comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

h) Inventories (Continued)

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

i) Construction contracts

Construction contracts are contracts specifically negotiated with a customer for the construction of an asset or a group of assets, where the customer is able to specify the major structural elements of the design. The accounting policy for contract revenue is set out in note 2(s)(ii). When the outcome of a construction contract can be estimated reliably, contract costs are recognised as an expense by reference to the stage of completion of the contract at the end of the reporting period. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately. Where the outcome of a construction contract cannot be estimated reliably, contract costs are recognised as an expense in the period in which they are incurred.

Construction contracts in progress at the end of the reporting period are recorded at the net amount of costs incurred plus recognised profits less recognised losses and progress billings, and are presented in the statement of financial position as the "Amounts due from customers for contract work" (as an asset) or the "Amounts due to customers for contract work" (as a liability), as applicable. Progress billings not yet paid by the customer are included under "Trade and other receivables". Amounts received before the related work is performed are presented as "Deposits received and receipts in advance".

j) Trade and other receivables

Trade and other receivables are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method less allowance for impairment of doubtful debts, except where the receivables are interest-free loans made to related parties without any fixed repayment terms or the effect of discounting would be immaterial. In such cases, the receivables are stated at cost less allowance for impairment of doubtful debts (see note 2(g)).

k) Prepayments for consultation, marketing and promotional services

Prepayments for consultation, marketing and promotional services are charged to profit or loss when the services are rendered by the service providers.

I) Interest-bearing borrowings

Interest-bearing borrowings are recognised initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost with any difference between the amount initially recognised and redemption value being recognised in profit or loss over the period of the borrowings, together with any interest and fees payable, using the effective interest method.

m) Trade and other payables

Trade and other payables are initially recognised at fair value. Trade and other payables are subsequently stated at amortised cost unless the effect of discounting would be immaterial, in which case they are stated at cost.

Cash and cash equivalents comprise cash at bank and on hand, demand deposits with banks and other financial institutions, and short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are also included as a component of cash and cash equivalents for the purpose of the consolidated statement of cash flows.

o) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new ordinary shares or options are shown in equity as a deduction from the proceeds.

p) Employee benefits

Short-term employee benefits and contributions to defined contribution retirement plans

Salaries, annual bonuses, paid annual leave, contributions to defined contribution retirement plans and the cost of non-monetary benefits are accrued in the year in which the associated services are rendered by employees. Where payment or settlement is deferred and the effect would be material, these amounts are stated at their present values.

ii) Share-based payments

The fair value of share options granted to employees is recognised as an employee cost with a corresponding increase in share option reserve within equity. The fair value is measured at grant date using the binomial option pricing model, taking into account the terms and conditions upon which the options were granted. Where the employees have to meet vesting conditions before becoming unconditionally entitled to the share options, the total estimated fair value of the share options is spread over the vesting period, taking into account the probability that the options will vest.

During the vesting period, the number of share options that is expected to vest is reviewed. Any resulting adjustment to the cumulative fair value recognised in prior years is charged/ credited to profit or loss for the year of the review, unless the original employee expenses qualify for recognition as an asset, with a corresponding adjustment to the share option reserve. On vesting date, the amount recognised as an expense is adjusted to reflect the actual number of share options that vest (with a corresponding adjustment to the share option reserve) except where forfeiture is only due to not achieving vesting conditions that relate to the market price of the Company's shares. The equity amount is recognised in the share option reserve until either the option is exercised (when it is transferred to the share premium account) or the option expires (when it is released directly to retained profits).

iii) Termination benefits

Termination benefits are recognised at the earlier of when the Group can no longer withdraw the offer of those benefits and when it recognises restructuring costs involving the payment of termination benefits.

q) Income tax

Income tax for the year comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in profit or loss except to the extent that they relate to items recognised in other comprehensive income or directly in equity, in which case the relevant amounts of tax are recognised in other comprehensive income or directly in equity, respectively.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits.

Apart from certain limited exceptions, all deferred tax liabilities, and all deferred tax assets to the extent that it is probable that future taxable profits will be available against which the asset can be utilised, are recognised. Future taxable profits that may support the recognition of deferred tax assets arising from deductible temporary differences include those that will arise from the reversal of existing taxable temporary differences, provided that those differences relate to the same taxation authority and the same taxable entity, and are expected to reverse either in the same period as the expected reversal of the deductible temporary differences or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward. The same criteria are adopted when determining whether existing taxable temporary differences support the recognition of deferred tax assets arising from unused tax losses and credits, that is, those differences are taken into account if they relate to the same taxation authority and the same taxable entity, and are expected to reverse in a period, or periods, in which the tax loss or credit can be utilised.

q) Income tax (Continued)

The limited exceptions to recognition of deferred tax assets and liabilities are those temporary differences arising from the initial recognition of assets or liabilities that affect neither accounting nor taxable profit (provided they are not part of a business combination), and temporary differences relating to investments in subsidiaries to the extent that, in the case of taxable differences, the Group controls the timing of the reversal and it is probable that the differences will not reverse in the foreseeable future, or in the case of deductible differences, unless it is probable that they will reverse in the future.

The amount of deferred tax recognised is measured based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantively enacted at the end of the reporting period. Deferred tax assets and liabilities are not discounted.

The carrying amount of a deferred tax asset is reviewed at the end of each reporting period and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the related tax benefit to be utilised. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

Additional income taxes that arise from the distribution of dividends are recognised when the liability to pay the related dividends is recognised.

r) Provisions and contingent liabilities

Provisions are recognised for other liabilities of uncertain timing or amount when the Group or the Company has a legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditure expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

s) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Provided it is probable that the economic benefits will flow to the Group and the revenue and costs, if applicable, can be measured reliably, revenue is recognised in profit or loss as follows:

i) Sales of goods

Revenue is recognised when goods are delivered which is taken to be the point in time when the customer has accepted the goods and the related risks and rewards of ownership. Revenue excludes value added tax and other sales taxes and is after deduction of any trade discount and returns.

Lease incentives granted are recognised in profit or loss as an integral part of the aggregate net lease payments receivable. Contingent rentals are recognised as income in the accounting period in which they are earned.

t) Translation of foreign currencies

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). These consolidated financial statements are presented in Renminbi ("RMB"), rounded to the nearest thousand except for per share data, which is different from the Company's functional currency of Hong Kong dollars ("HK\$") as the majority of the Group's transactions is denominated in RMB.

Foreign currency transactions during the year are translated at the foreign exchange rates ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated at the foreign exchange rates ruling at the end of the reporting period. Exchange gains and losses are recognised in profit or loss, except those arising from foreign currency borrowings used to hedge a net investment in a foreign operation which are recognised in other comprehensive income.

Non-monetary assets and liabilities measured in terms of historical cost in a foreign currency are translated using the foreign exchange rates ruling at the transaction dates. Statement of financial position items are translated into RMB at the closing foreign exchange rates ruling at the end of the reporting period. The resulting exchange differences are recognised in other comprehensive income and accumulated separately in equity in the translation reserve.

On the disposal of any of such entities, the cumulative amount of the exchange differences relating to that foreign operation is reclassified from equity to profit or loss when the profit or loss on disposal is recognised.

u) Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset which necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of that asset. The capitalisation of borrowing costs as part of the cost of a qualifying asset commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress. 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

w) Research and development costs

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internallygenerated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

x) Segment reporting

Operating segments, and the amounts of each segment item reported in the financial statements, are identified from the financial information provided regularly to the Group's Chairman of the board of directors, who is the Group's chief operating decision maker, for the purposes of allocating resources to, and assessing the performance of, the Group's various lines of business and geographical locations.

Individually material operating segments are not aggregated for financial reporting purposes unless the segments have similar economic characteristics and are similar in respect of the nature of products and services, the nature of production processes, the type or class of customers, the methods used to distribute the products or provide the services, and the nature of the regulatory environment. Operating segments which are not individually material may be aggregated if they share a majority of these criteria.

3. CHANGES IN ACCOUNTING POLICIES (Continued)

Amendments to HKFRS 10, HKFRS 12 and HKAS 27, Investment Entities

The amendments provide consolidation relief to those parents which qualify to be an investment entity as defined in the amended HKFRS 10. Investment entities are required to measure their subsidiaries at fair value through profit or loss. These amendments do not have an impact on these financial statements as the Company does not qualify to be an investment entity.

Amendments to HKAS 32, Offsetting Financial Assets and Financial Liabilities

The amendments to HKAS 32 clarify the offsetting criteria in HKAS 32. The amendments do not have an impact on these financial statements as they are consistent with the policies already adopted by the Group.

Amendments to HKAS 36, Recoverable Amount Disclosures for Non-financial Assets

The amendments to HKAS 36 modify the disclosure requirements for impaired non-financial assets. Among them, the amendments expand the disclosures required for an impaired asset or cash generating unit whose recoverable amount is based on fair value less costs of disposal. The application of amendments does not have an impact on these financial statements because there is no impaired non-financial asset or cash generating unit which the recoverable amount is based on fair value less costs of disposal.

Amendments to HKAS 39, Novation of Derivatives and Continuation of Hedge Accounting

The amendments to HKAS 39 provide relief from discontinuing hedging accounting when novation of a derivative designated as a hedging instrument meets certain criteria. The amendments do not have an impact on these financial statements as the Group does not have any derivatives that subject to novation.

7. RETIREMENT BENEFITS COSTS

Defined contribution retirement plan

The Group has arranged for its Hong Kong employees employed under the jurisdiction of the Hong Kong Employment Ordinance to join the Mandatory Provident Fund Scheme (the "MPF Scheme") under the Hong Kong Mandatory Provident Fund Schemes Ordinance and Hong Kong Employment Ordinance. The MPF Scheme is a defined contribution retirement plan managed by independent trustees. Under the MPF Scheme, the Group (the employer) and its employees makes monthly contributions to the scheme at 5% of the employees' relevant income as defined under the Mandatory Provident Fund Schemes Ordinance. The contributions from each of the employer and employees are subject to a cap of HK\$1,500 per month (HK\$1,250 per month prior to June 2014) and thereafter contributions are voluntary. Contributions to the plan vest immediately.

The employees of the Group's subsidiaries established in the PRC are members of a state-sponsored retirement plan operated by the local government in the PRC and these subsidiaries make mandatory contributions to the state-sponsored retirement plan to fund the employees retirement benefits. The retirement contributions paid by these subsidiaries are based on a certain percentage of the relevant portion of the payroll of all qualifying employees in accordance with the relevant regulations in the PRC and are charged to profit or loss as incurred. The Group discharges its retirement obligations upon payment of the retirement contributions to the state-sponsored retirement plan operated by the local governments in the PRC.

A new law of the PRC on employment contracts (the "Employment Contract Law") was adopted by the Standing Committee of the National People's Congress of the PRC in 2008 and became effective on 1 January 2008. Compliance with the requirements under the new law, in particular, the requirement of severance payment and non-fixed term employment contract led to increase in the staff costs of the Group.

7. 退休福利成本

定額供款退休計劃

中國新勞動合同法(「勞動合同法」)於二零零八年獲全國人民代表大會常務委員會採納並自二零零八年一月一日開始生效。遵守新法律之規定,特別是遣散費及非固定期限勞動合同之規定導致本集團之員工成本增加。

For the year ended 31 December 2014 截至二零一四年十二月三十一日止年度

7. RETIREMENT BENEFITS COSTS (Continued)

Pursuant to the new Employment Contract Law, the PRC subsidiaries are required to enter into non-fixed term employment contract with employees who have worked for more than 10 years or with whom a fixed term employment has been concluded for 2 consecutive terms. The employer is required to make a severance payment to the employee when the term of the employment contract expires unless the employee voluntarily terminates the contract or voluntarily rejects the offer to renew the contract in which case the terms are no worse off than the terms of other employment contracts available to him/ her. The severance payment will equal to the monthly wages times the number of full years that the employee has been working for the employer. The minimum wages requirement has also been imposed. Fines will be imposed for any breach of the Employment Contract Law.

The Group has no other material obligation for the payment of retirement benefits associated with the schemes beyond the contributions described above.

The Group's contributions to defined contribution retirement plans for the years ended 31 December 2014 and 2013 are as follows:

b) Deferred taxation (Continued)

Pursuant to the Enterprise Income Tax Laws of the PRC (the "New EIT Laws"), a 10% withholding tax is levied on dividends declared to foreign investors from foreign investment enterprise established in the PRC. The requirement is effective from 1 January 2008 and applies to earnings after 31 December 2007. A lower withholding tax rate may be applied if there is a tax arrangement between the PRC and the jurisdiction of the foreign investors. For the Group, the applicable tax rate is 10%. The Group is therefore liable to withholding taxes on dividend distributed by those subsidiaries established in the PRC in respect of earnings generated from 1 January 2008 onwards. The Group recognised deferred tax liabilities in respect of expected distributable earnings from its subsidiaries established in the PRC since 1 January 2008 with reference to the Group's dividend policy, no matter whether any dividends have been declared out of such earnings by the subsidiaries at the reporting date. The directors of the Company will review the funding requirements of the Group from time to time and revise the dividend policy of its subsidiaries as appropriate.

There are no income tax consequences attaching to the payment of dividends by the Company to its shareholders.

As at 31 December 2014, the Group has not recognised deferred tax assets arising from tax losses amounting to approximately RMB60,683,000 (2013: RMB48,396,000) due to the unpredictability of the future profit streams. All tax losses in the PRC will be gradually expired within five years to 2020 (2013: 2019). The remaining tax losses can be carried forward indefinitely.

37. CAPITAL MANAGEMENT

The Group's primary objectives when managing capital are to safeguard the Group's ability to continue as a going concern, and to generate sufficient profit to maintain growth and provide a satisfactory return to its shareholders.

The management actively and regularly reviews and manages its capital structure to maintain a balance between the higher shareholder returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position, and makes adjustments to the capital structure through the amount of dividend payment to shareholders or raise new debt financing. No changes were made in the objectives or policies during the year.

The management monitors the Group's capital structure on the basis of a net debt-to-equity ratio. For this purpose, the Group defines net debt as total debt (which includes interest-bearing loans and borrowings, trade and other payables, and deposits received and receipts in advance plus unaccrued proposed dividends minus cash and bank balances).

The net debt-to-equity ratio as at 31 December 2014 and 2013 was as follows:

b) Financial risk management objective and policies

Exposure to credit, interest rate, liquidity and currency risks arises in the normal course of the Group's business. These risks are limited by the Group's financial management policies and practices described below.

There has been no change to the types of the Group's exposure in respect of financial instruments or the manner in which it manages and measures the risks.

b) Financial risk management objective and policies (Continued)

i) Credit risk

As at 31 December 2014, the maximum exposure to credit risk is represented by the carrying amount of each financial asset in the consolidated statement of financial position after deducting any impairment allowance.

The Group's credit risk is primarily attributable to trade receivables, amounts due from related parties, and other receivables which are disclosed elsewhere in these financial statements. Management has a credit policy in place and the exposures to these credit risks are monitored on an ongoing basis.

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults.

In respect of trade receivables, individual credit evaluations are performed on all customers requiring credit over a certain amount. These evaluations focus on the customer's past history of making payments when due and current ability to pay, and take into account information specific to the customer as well as pertaining to the economic environment in which the customer operates. Trade receivables are normally due within 60 days from the date of billing. Normally, the Group does not obtain collateral from its customers.

i) Credit risk (Continued)

In respect of trade receivables, the Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. Taking into account the creditworthiness of the Group's customers, the credit risk measures and the historical levels of the bad debts, the directors of the Company consider that such concentration of credit risk would result in significant credit default exposure to the Group. At the end of the reporting period, 3.31% (2013: 2.11%) and 15.42% (2013: 20.96%) of trade receivables were due from the Group's largest customer and the five largest customers, respectively, arose from the sales of EP products and equipment segment.

Further quantitative disclosures in respect of the Group's exposure to credit risk arising from trade receivables are set out in Note 19.

Amounts due from related parties are regularly monitored by the Group and follow up actions are taken to recover these balances in the case of any risk of default.

The Company's credit risk is primarily attributable to amounts due from subsidiaries and other receivables. The Company reviews the recoverable amounts of individual debts at the end of each reporting period to ensure that adequate impairment losses are made for irrecoverable amounts.

The credit risk on liquid funds is limited because the counterparties are banks with good reputation and high credit ratings.

The credit risk associated with an advance to a local government authority is low because the counterparty is PRC local government. The carrying amount of the amount advanced to the local government authority amounted to approximately RMB17,230,000 (2013: RMB17,230,000) (see note 19(e)).

ii) Interest rate risk

The Group's cash flow interest rate risk and fair value interest rate risks relate primarily to variable-rates and fixed rates, respectively, of pledged bank deposits, bank balances and short-term bank loans. The Group's normal policy is not to use any derivative contracts to hedge its exposure to interest rate risk. However, the management of the Company will consider hedging significant interest rate exposure should the need arises. The Group's interest rate profile as monitored by management is set out in (i) below.

 - ii) Sensitivity analysis

At 31 December 2014, it is estimated that a general increase/decrease of 100 basis points in interest rates, with all other variables held constant, would increase/decrease the Group's profit after tax and increase/decrease the Group's retained profits by approximately RMB2,788,000 (2013: decrease/increase the Group's loss after tax and increase/decrease the Group's retained profits by approximately RMB4,294,000). Other components of equity would not be affected by the changes in interest rates.

The sensitivity analysis above has been determined assuming that the change in interest rates had occurred at the end of the reporting period and had been applied to the exposure to interest rate risk for non-derivative financial instruments in existence at that date. The 100 basis point increase or decrease represents management's assessment of a reasonably possible change in interest rates over the period until the end of the next reporting period. The analysis is performed on the same basis for year 2013.

The Group's fair value interest rate risk relates primarily to fixed rate bank borrowings. The directors of the Company consider the fair value interest rate risk is insignificant to the Group as most of them are short-term.

Liquidity risk is the risk that the Group will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset as they fall due. The Group's policy is to regularly monitor current and expected liquidity requirements and its compliance with lending covenants and to ensure that it maintains sufficient reserves of cash and adequate committed lines of funding from banks to meet its liquidity requirements in the short and longer term.

The following table details the remaining contractual maturities at the end of the reporting period of the Group's and the Company's non-derivative financial liabilities, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of the reporting period) and the earliest date the Group and the Company can be required to pay.

The following table summarises the maturity analysis of bank loans with a repayment on demand clause based on agreed scheduled repayments set out in the loan agreements. The amounts include interest payments computed using contractual rates. As a result, these amounts are greater than the amounts disclosed in the "within 1 year or on demand" time band in the above maturity analysis. Taking into account of the Group's financial position, the directors of the Company do not consider it is probable that the banks will exercise their discretion to demand immediate repayment. The directors of the Company believe that these bank loans will be repaid in accordance with the scheduled repayment dates set out in the loan agreements.

iv) Currency risk

The Group is exposed to currency risk primarily through sales and purchases that are denominated in a currency other than the functional currency of the operations to which they relate. The Group currently does not have a foreign currency hedging policy. However, the management monitors foreign exchange exposure and will consider hedging significant foreign currency exposure if necessary.

i) Exposure to currency risk

The Company's exposure to currency risk is insignificant as the Company did not have material financial instruments that were denominated in a currency other than the functional currency in which they measured as at 31 December 2014 and 2013.

The following table details the Group's exposure at the end of each reporting period to currency risk arising from recognised assets and liabilities denominated in a currency other than the functional currency of the entity to which they relate. For presentation purposes, the amounts of exposure are shown in RMB, translated using the spot rate at the end of the reporting period.

ii) Sensitivity analysis

The following table indicates the approximate change in the Group's profit/(loss) after tax for the year and retained profits and other components of equity in response to reasonably possible changes in the foreign exchange rates to which the Group has significant exposure at the end of the reporting period.

2014 二零一四年							
Increase/ (decrease) in foreign exchange rates 外幣匯率 增加/ (減少)	Effect on profit after tax 對除稅後 溢利之影響 RMB'000 人民幣千元	Effect on retained profits 對保留 溢利之影響 RMB'000 人民幣千元	Effect on other components of equity 對權益其他 部分之影響 RMB'000 人民幣千元				
1% (1%)	27 (27)	27 (27)	- -				

The Company has no significant currency risk at the end of each reporting period.

The sensitivity analysis above has been determined assuming that the change in foreign exchange rate had occurred at the end of the reporting period and had been applied to the Group's exposure to currency risk for financial instruments in existence at that date. The stated changes represent management's assessment of reasonably possible changes in foreign exchanges rates over the period until the end of the next reporting period. The analysis is performed on the same basis for year 2013.

In the management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk as the year-end exposure does not affect the exposure during the year.

c) Estimation of fair values

The following summarises the major methods and assumptions used in estimating the fair values of the following financial instruments.

i) Liquid or/and short-term assets and liabilities

For financial assets and financial liabilities that are liquid or having a short-term maturity, it is assumed that the carrying amounts approximate their fair values. The assumption is applied to trade and other receivables, trade and other payables, pledged bank deposits, short-term bank loans and bank balances without a specific maturity.

39. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATES UNCERTAINTY

a) Key sources of estimation uncertainty

In the application of the Group's accounting policies, which are described in note 2, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumption are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if revision affects both current and future period.

39. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATES UNCERTAINTY (Continued)

- a) Key sources of estimation uncertainty (Continued)
 - Useful lives and residual values of property, plant and equipment and prepaid lease payments

Management determines the estimated useful lives and residual values for the Group's property, plant and equipment and prepaid lease payments in accordance with the Group's accounting policies stated in note 2(e) and note 2(f) respectively. The Group will revise the depreciation charge and the amortisation expense where useful lives and residual values are different from previous estimates, or will write off or write down technically obsolete or non-strategic assets that have been abandoned or sold.

ii) Impairment of property, plant and equipment and prepaid lease payments

If circumstances indicate that the carrying value of an item of the property, plant and equipment and prepaid lease payments may not be recoverable. the asset may be considered "impaired", and an impairment loss may be recognised in profit or loss in accordance with the accounting policy for impairment of property, plant and equipment and prepaid lease payments as described in note 2(g)(ii). The carrying amounts of assets are reviewed periodically in order to assess whether the recoverable amounts have declined below the carrying amounts. These assets are tested for impairment whenever events or changes in circumstances indicate that their recorded carrying amounts may not be recoverable. When such a decline has occurred, the carrying amount is reduced to recoverable amount.

The recoverable amount is the greater of the fair value less costs of disposal and the value in use. In determining the value in use, expected future cash flows generated by the asset are discounted to their present value, which requires significant judgement relating to the level of revenue and amount of operating costs. The Group uses all readily available information in determining an amount that is a reasonable approximation of recoverable amount, including estimates based on reasonable and supportable assumptions and projections of the level of revenue and amount of operation costs. Changes in these estimates could have a significant impact on the carrying value of the assets and could result in additional impairment charge or reversal of impairment in future periods. As at 31 December 2014, the carrying amount of the Group's prepaid lease payments, and property, plant and equipment are approximately RMB54,534,000 (2013: RMB55,729,000) and RMB451,690,000 (2013: RMB366,325,000), respectively.

可收回金額乃公平值減出 售成本與使用價值之較高 者。釐定使用價值時, 會將資產產生之預期未來 現金流量折現至其現值, 此需要對收益水平及經營 成本金額作出重大判斷。 本集團利用所有可得資 料(包括基於合理及有力 假設之估計以及對收益水 平及經營成本金額之預 測),釐定可收回金額之 合理近似金額。該等估 計之變動可能對資產賬 面值產生重大影響,並 可能導致於未來期間之 額外減值支出或撥回減 值。於二零一四年十二月 三十一日,本集團之預 付租賃款項以及物業、 廠房及設備賬面值分別 約 為 人 民 幣54,534,000 元(二零一三年:人民幣 55,729,000元)及人民幣 451,690,000元(二零一 三年:366,325,000元)。

iii) Net realisable value of inventories

Net realisable value of inventories is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale. These estimates are based on the current market conditions and the historical experience of manufacturing and selling products of similar nature. Management will reassess the estimates at the end of each reporting period. The carrying amount of the Group's inventories as at 31 December 2014 is approximately RMB244,270,000 (2013: RMB97,365,000).

iv) Trade and other receivables

The Group's management determines the provision for impairment of trade and other receivables. This estimate is based on the credit history of its customers and the current market conditions. Management reassesses the provision at the end of each reporting period. The carrying amount of the Group's loans and receivables (included in trade and other receivables) as at 31 December 2014 is approximately RMB228,261,000 (2013: RMB241,216,000).

v) Construction contracts

As explained in policy notes 2(i) and (2)(s)(ii), revenue and profit recognition on an incompleted project is dependent on estimating the total outcome of the construction contract, as well as the work done to date. Based on the Group's recent experience and the nature of the construction activities undertaken by the Group, the Group makes estimates of the point at which it considers the work is sufficiently advanced such that the costs to complete and revenue can be reliably estimated. As a result, until this point is reached the amounts due from customers for contract work as disclosed in note 26 will not include profit or loss which the Group may eventually realise from the work done to date. In addition, actual outcomes in terms of total cost or revenue may be higher or lower than that estimated at the end of the reporting period, which would affect the revenue and profit recognised in future years as an adjustment to the amounts recorded to date.

vi) Warranty provisions

As explained in note 36, the Group does not make provision for product warranties it gives on sales of its EP products and provision of EP construction engineering projects, taking into account the Group's recent claim experience as the Group has also received warranties in respect of those construction work and equipment supplied from its sub-contractors and suppliers. It is not indicative of future claims that it will receive in respect of past sales.

v) 建造合約

誠如政策附註2(i)及(2)(s)(ii) 所述,未完成項目的收 入及溢利確認取決於建 造合約的成果及直至當 日止的工作完成程度的 估計。根據本集團最近 經驗及本集團進行的建 造業務性質,本集團已 就其認為工程已取得充 足預付款項而作出估 計,因此能夠可靠地估 計完成成本及收入。因 此,直至此金額達到附 註26所披露的合約工 程應收客戶款項為止, 不會計入本集團最終自 截至當日止工程完成進 度中所變現的損益。此 外,以總成本或收入計 算的實際成果可能高於 或低於報告期末的估 計,可能影響未來數年 的收入及溢利,作為截 至當日錄得金額的調整。

39. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATES UNCERTAINTY (Continued)

b) Critical accounting judgements in applying the Group's accounting policies

In determining the carrying amounts of certain assets and liabilities, the Group makes assumptions for the effects of uncertain future events on those assets and liabilities at the end of each reporting period. These estimates involve assumptions about such items as cash flows and discount rates used. The Group's estimates and assumptions are based on historical experience and expectations of future events and are reviewed periodically. In addition to assumptions and estimations of future events, judgements are also made during the process of applying the Group's accounting policies.

i) Income taxes

The Group is subject to income tax in Hong Kong and various taxes in the PRC. Significant judgement is required in determining the provision for taxation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax issues based on estimates of whether additional tax will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

b) 應用本集團之會計政策當中作 出之重要判斷

i) 所得税

本集團在香港須繳付所 得税,而在中國須繳付 不同税項。於釐定税項 撥備時須作出重大判 斷。於一般業務過程中 存有頗多交易及計算, 使得最終税務釐定存在 不確定性。本集團根據 對是否須繳納額外稅項 之估計就預期税務事宜 確認負債。倘上述事宜 之最終税務結果與最初 記錄之金額有所不同, 有關差額將影響作出有 關釐定期間之所得税及 遞延税項撥備。

- b) Critical accounting judgements in applying the Group's accounting policies (Continued)
 - ii) Withholding tax on the distributable profits of the Company's PRC subsidiaries

On 16 March 2007, National People's Congress approved the New EIT Laws which was effective from 1 January 2008. According to the relevant regulations of the New EIT Laws, when a foreign investment enterprise distributes dividends out of the profits earned from 1 January 2008 onwards to its foreign investors, they are subject to the PRC Enterprise Income Tax. The applicable income tax rate varies with the origin of the overseas investors.

The Group has made provision for withholding tax on dividends expected to be remitted from the subsidiaries established in the PRC, based on the Group's general dividend policy for the profits generated by these subsidiaries after 1 January 2008. The Group provided withholding tax for such undistributed profits as deferred tax liabilities. The directors of the Company will regularly review the dividend distribution policy of these subsidiaries from time to time.

40. IMMEDIATE AND ULTIMATE CONTROLLING PARTY

The directors of the Company consider the immediate and ultimate controlling party of the Group to be Praise Fortune Limited, which was incorporated in the British Virgin Islands. This entity does not produce financial statements available for public use.
